option!**

Cessna 182 SKYLANE

Almost-Ready-to-Fly .60-1.20 Sport Scale Airplane

Unmistakably Cessna. Gotta be Top Flite.

The look of the Cessna Skylane 182 is unmistakable and easy to enjoy with this Gold Edition ARF. The attention to authentic touches is obvious at every turn, from the built-in lighting system to the twin radio antenna on the wing. But what's even more remarkable is the ease of reproducing those details and the gentle handling that makes this ARF a great choice for virtually any pilot.

- *Factory-built wood sections and a factory-applied, Cessna-style trim scheme reduce assembly time to just 18-25 hours.*
- *Painted fiberglass details include traditional time savers like the cowl and wheel pants, as well as added extras that include updated, one-piece wing and landing gear struts, Horner wing tips and molded-in corrugations for control surfaces.*
- *The lighting system includes a Mars beacon as well as landing and nav lights. It's a costly add-on with some kits, but an installed extra on the Skylane 182 ARF.*
- *The full cockpit interior includes seats and sides, plus a redesigned 3D instrument panel. Details include raised dials and control yokes, as well as color graphics.*
- *The accessory/hardware package includes staples like the steerable nosewheel and extras that include a beautifully polished aluminum spinner.*

TOPA0906
 Wingspan: 81 in (2,060 mm) Weight: 11.5-12.5 lb (5.22-5.67 kg)
 Wing Area: 898 in² (57.9 dm²) Wing Loading: 30-32 oz/ft² (92-98 g/dm²)

Cessna 182 SKYLANE®

Almost-Ready-to-Fly .60-1.20 Sport Scale Airplane

You can go with glow or opt for electric — and performance is great either way. A magnetic hatch between the landing gear eases battery pack changes without affecting scale looks.

A cockpit kit is an option with some kits, but included with the Top Flite Skylane 182. It's completely authentic, from C-pillars, seats and sides panels to the control yokes and updated instrument array up front.
